HEAT TREAT WARMERS

Open the package and expose the Warmer to air and it will immediately start to heat up!

Each Heat Treat pouch contains iron, cellulose, vermiculite, activated carbon, salt and water. When the iron is exposed to oxygen, it starts to oxidize and produces heat. The salt acts as a catalyst and the carbon helps disperse the heat. The vermiculite is an insulator to retain the heat. Cellulose is a fill.

The average temperature is 100 degrees F! Non-toxic, environmentally friendly, all natural ingredients, odorless and non-combustible.

A2951
Toe Warmers
Last for 6+ hours;
display box of 40 pr.

A2952
Hand Warmers
Last 7+ hours; display
box of 40 pairs

LAST BUTT NOT LEAST!

Award-winning Anti Monkey Butt™ Powder is specially formulated to prevent soreness and itching caused by frictional skin irritation. (Motorcycle riders use the term “monkey butt” to describe the redness, itching and soreness caused by the friction of riding.)

Evaluated and praised in four industries – horse, motorcycle, trucking and ATV.

Anti Monkey Butt powder absorbs sweat and reduces friction, the two leading causes of monkey butt.

Active ingredients: calamine powder (USP) 8%
